Career Profile

Driven by my passion for web development, I am eager to take on new opportunities that allow me to enhance my analytical and technical skills while contributing to a dynamic, client-focused team. With a determined commitment to staying current with the latest industry trends and technologies, I am dedicated to leveraging my expertise to develop innovative and effective web solutions.

Key Skills

- **HTML/CSS:** strong understanding of HTML and CSS, including responsive design principles.
- Knowledge of working with CSS Frameworks such as **Bootstrap** and **CSS preprocessors (SASS)**.
- **JavaScript:** proficient in working with JavaScript, including knowledge of its core concepts, and ability to write code using both ES5 and ES6 syntax.
- **ReactJS:** proficient in developing web applications using ReactJS, Redux or Context API. Skilled in creating reusable React components and integrating them into larger applications.
- **WordPress** development: ability to create and maintain custom WordPress sites ensuring optimal functionality and user experience.
- **Debugging:** ability to troubleshoot and debug code, including the use of debugging tools like Chrome DevTools.
- **RESTful API's:** experience building RESTful API's with **Node.js** and **Express.js**.
- Experience working with **NPM** and Version Control System (**Git & GitHub**)
- Ability to **multi-task in a fast-paced environment** while maintaining an **emphasis on quality**.
- Strong **problem solving, communication and collaboration skills**, including ability to work well with other developers.
- **Strong Desire to learn** and improve my current skills as well as develop new ones to be able to contribute more to the team.

EDUCATION

Bachelor of Electrical Engineering – Major in Telecommunications & IT (2007). AREA 1 – University of Science and Technology, Salvador, Brazil.

CERTIFICATIONS

Professional Scrum Master I (PSM I) – 2023 Scrum.org

EMPLOYMENT

Front End Developer for Thrive Project (not-for-profit organisation) – Current

THRIVE Project is a for-impact social enterprise whose mission is to ensure the long-term well-being and 'thrivability' of all humanity. As a Volunteer Front End Developer for Thrive I have been collaborating with other developers in multiple projects. We are currently focusing on an Account Management System that allows for the administration of new accounts as they are added, updated, or removed. This system encompasses various services, including webmail, Slack, and WordPress accounts. Our plan is to revamp the UI Dashboard by utilising React.js and integrating it with an NodeJs-based API server.

Director at Xtreme Safety Pty Ltd - Jun 2016 – Current (www.xtremesafety.com.au)

Xtreme Safety is a WordPress based Woocommerce store with main focus on supplying safety equipment to construction workers in Australia. The website has integration with all major marketplaces here in Australia (Ebay, Catch, Kogan, Mydeal and Amazon). I am part of this project since it was first implemented in 2016 and I currently work resolving application and performance issues as well as adding new features and functionalities.

Key Responsibilities:

- Creating and Implementing new features and functionalities.
- WordPress CMS management.
- WordPress SEO using Yoast SEO plugin.
- Run manual backup to the entire WordPress installation, including WordPress database, files, themes and plugins.
- Conducting website performance tests and troubleshooting content issues.

Project Coordinator at Bare Demolition Pty Ltd - Nov 2011 – May 2017

As a project Coordinator for Bare Demolition, I was accountable for the overall operational and financial delivery of assigned projects. I was responsible for multiple projects at one time providing technical advice to improve demolition methods and procedural changes. I was also responsible for improving the quality of services as well as the safety of all employees.

Key Responsibilities:

- Responsible for controlling and minimising risk on projects.
- Overseeing the establishment of cost targets, program and critical path.
- Developing Site-specific management plans and methodologies.
- Working close to the Site Supervisor managing changes to engineering scope.
- Ensuring codes and regulations are applicable to the project: permits, licenses and authorisations have been established prior to commencement.
- Providing monthly project report detailing all financial, program, delays, or any other major issues on the project.
- Ensuring the compliance of Work Health and Safety policies and procedures as outlined in the Safety Management Plan.

Electrical Engineer at Caraiba Metais – Department of Factory Engineering - Jan 2008 – Feb 2010

I started my career at Caraiba Metais as an Electrical Engineer Trainee in my last year of university. After graduating I was offered a full-time position as a Junior Electrical Engineer at the Department of Factory Engineering. Our main goal was to design, implement and maintain new projects to improve the overall efficiency of the whole plant as well as reduce environmental contamination and financial costs related to maintenance.

Key Responsibilities:

- Performing analysis of plant performance and maintenance execution to identify and prioritise improvement and corrective work.
- Implementing maintenance plan improvements and initiate Maintenance Strategy changes to optimise safety, final product quality as well as overall cost.
- Working side by side with Senior Electrical Engineers designing, implementing and maintaining electrical systems for a variety of Industrial processes.
- Conducting technical assessments, developing project plans, and ensuring that all work is completed in accordance with relevant regulations and standards.
- Assisting site operational staff in fault finding and problem solving.
- Providing guidance and support to other team members, as well as collaborating with other departments to achieve project goals.
